AMENDMENTS TO THE CLAIMS

Please substitute the following pending claims 103-116 as replacement claims for the previously-pending claims. In this Amendment, claim 103 has been amended.

1-102. (Canceled)

103. (Currently amended) A method of making a prosthesis comprising the steps of: extruding a thermoplastic elastomer with the aid of a blowing agent, to produce a foamed graft; and

reticulating and optionally annealing the foamed graft to effect an open-cell structure.

- 104. (Original) The method of Claim 103 wherein the blowing agent comprises a physical blowing agent.
- 105. (Original) The method of Claim 103 wherein the blowing agent comprises a chemical blowing agent.
- 106. (Original) The method of Claim 103 wherein the blowing agent comprises physical and chemical blowing agents.
- 107. (Original) The method of Claim 103 wherein the thermoplastic elastomer comprises a polyurethane.
- 108. (Original) The method of Claim 103 wherein the thermoplastic elastomer further comprises reinforcing fibers.
 - 109. (Original) A biosynthetic heart valve made according to the method of Claim 103.
 - 110. (Original) A sewing ring made according to the method of Claim 103.
 - 111. (Original) A stent made according to the method of Claim 103.

- 112. (Original) A vascular graft prosthesis made according to the method of Claim 103.
- 113. (Previously Presented) The method of claim 107, wherein the polyurethane is selected from the group consisting of Pellethane, Biomer type polyurethanes, Chronoflex, Hydrothane and combinations thereof.
- 114. (Previously Presented) The method of claim 104, wherein the physical blowing agent is selected from the group consisting of chlorofluorocarbons, pentane, hexane and combinations thereof.
- 115. (Previously Presented) The method of claim 105, wherein the chemical blowing agent is selected from the group consisting of sodium bicarbonate, azodicarbonamides and combinations thereof.
- 116. (Previously Presented) The method of claim 103, comprising annealing the foamed graft to effect the open-cell structure.
